

Name: _____

The food people eat

We all need food to live. We eat many different kinds of food. People get their food in different ways.

Look at the pictures below. Name the different foods you can see in each picture:

Answer the following questions by referring to the pictures given:

1. Which foods in the pictures are from animals, and which are from plants?

2. What foods can we get from ...

- a. wheat? _____
- b. corn? _____
- c. cows? _____
- d. pigs? _____
- e. sheep? _____

Some of the food we eat comes from animals, including beef, veal, lamb, pork, fish and chicken. Other foods come from plants, including rice, wheat, fruit, beans and vegetables.

We also eat food made by animals. For example, chickens produce eggs, and cows give milk. Plants also produce food, such as fruits and vegetables. Plant and animal foods can also be used to make other foods, such as bread and cheese.

**DID YOU
KNOW?**

Cheese is an animal food because it is made from milk, which is produced by cows.
