

Name: _____

Mining and Settlements

When people first discovered a mineral resource, there were no settlements nearby. They started to mine and live in tents. More and more people came and a settlement began.

The first diamond to be discovered in South Africa was found on a farm near Kimberley in 1866. Kimberley developed because of mining.

Activity 4

Answer the questions below by looking at the above map

1. Which minerals are mined in your province?

2. Which minerals are mined in the Free State?

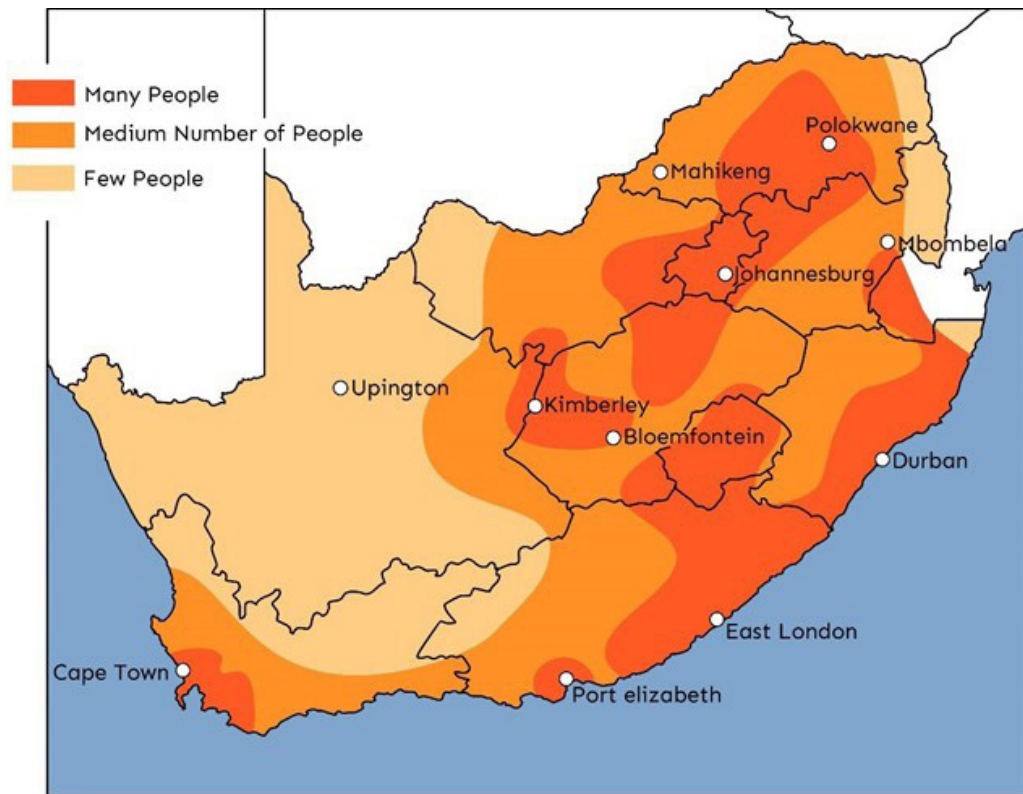

WWW.

Watch the following powerpoint presentation regarding renewable and non-renewable resources as well as the formation of coal.
<http://goo.gl/ol0JC6>

3. Which provinces have no minerals?

4. Which province has the most coal?

Study the map below and answer the questions that follow:

Activity 5:

1. Underline the correct answer:
I live in an area where (many people / a medium number of people / few people) live.
2. Compare the map which shows where the mines in South Africa are situated with the map that shows where people live in South Africa. Remember that people settle where they find jobs. Your comparison must be at least 5 sentences long.

Gold: From ore to Krugerrand
