

Research Project

Read Literature for the Project

Writing a research project might seem very daunting, especially if you're doing it for the first time. Here's a simple guide to help you through the process:

Choosing a Topic:

Pick a topic that genuinely interests you and makes you want to explore it more. Your goal is to create a convincing argument, so find a subject that excites you enough to delve deeper.

Understanding Research Projects:

Think of a research project as a longer, more detailed version of an academic essay. While it requires more effort, it allows you to create a more detailed argument and learn more about your chosen topic. The project showcases your ability to research and build a persuasive argument. The success of your project depends on how well you engage with sources and contribute original ideas.

Essential Components:

1. Introduction:

- ✓ Introduce your topic and explain how you will address it.
- ✓ A strong introduction grabs the reader's interest and sets the tone for the paper.

2. Hypothesis:

- ✓ This is a crucial part of the introduction.
- ✓ A good hypothesis declares what your paper is about, presents a clear opinion, and summarises the points you'll cover.

3. Body:

- ✓ The largest section where you support your hypothesis.
- ✓ Each paragraph should focus on a single idea, introduced by a topic sentence.
- ✓ The topic sentence, like a mini-hypothesis, sets the tone for the paragraph.

4. Conclusion:

- ✓ Summarise your project and reinforce your argument.
- ✓ It's common to restate the hypothesis in the conclusion.
